INTRODUCTION

The web-based “Online Crime Reporting” project is an attempt to stimulate the basic concepts of the crime reporting system. There are three types of users(Role: Admin, Police Station, Complainant) who will be using this portal. The system enables the users to do the things such as register a complaint after login or register an emergency complaint in case of urgency to the region wise police station and then track the progress of complaint.

MOTIVATION

- Easy to access to end user to register there complaint as soon as possible.
- No need to rush/travel for register complaint.
- As per time save purpose(travel to police station and let know police about crime)
- Centralized crime management system.
- To every user easily available and accessible.

OBJECTIVE

- People can easily report crime online.
- Criminal details in a centralized database.
- Can help in storing the records related to the criminals, cases, complaint record, case history and so on.
- Easy operations for the operator of the system. User interfaces are user accommodating and attractive; it takes very less time for the operator to use the system.

Technology Used For Making Project

Frontend: - React.js , HTML, CSS

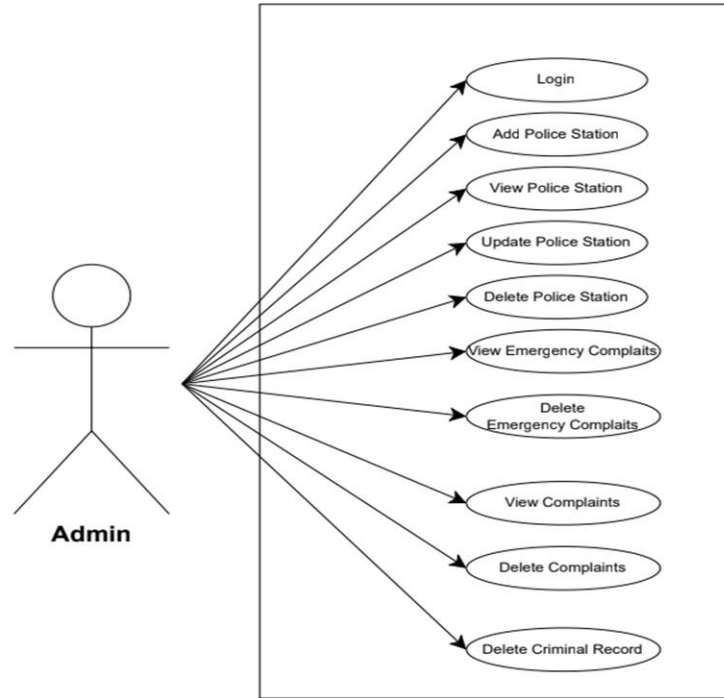

Backend: - JAVA Spring-boot

Database Connection: - MySQL

USER PROFILE

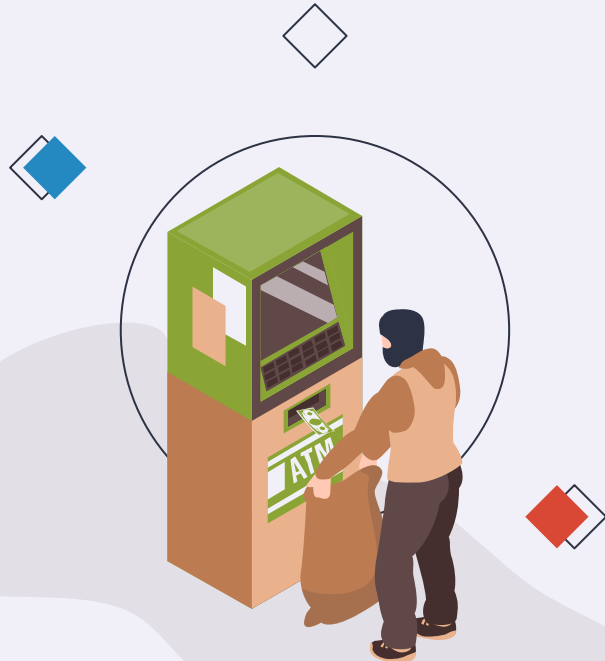

CONCLUSION

The online crime reporting system is a web application and helps the people to register all type of complaints in a single web site with many features and easy to use and simple with the non-complex approach. And from police station purpose easy to get connected with end users.

FUTURE ENHANCEMENT

- From police side to user side notifications provider
- Informing user about criminals and recent or most frequently happened crimes with statistics.
- Making strong and powerful web site.

THANKS!
